**NEW GRB<sup>™</sup>+  
GLUTATHIONE DRINK MIX****When should I use GRB<sup>™</sup>+?**

When you need an energy boost. When you need to stay awake and focus. When you need an immunity boost. When you are under stress. When you have a tough workout. When you need to work overtime. When you travel or are jet lagged.

**What are the benefits of GRB<sup>™</sup>+?**

GRB<sup>™</sup>+ Boosts Energy, Improves Focus, Advances Endurance, Supports Immune Health, Raises Glutathione levels. Increases Nitric Oxide (NO<sub>2</sub>), Shortens Recovery time, Protects the Body's cells.

**What is Glutathione?**

The Supreme Antioxidant - Glutathione is a super antioxidant and antitoxin. Boosts immune system, promotes anti-aging and improves cellular function. In contrast to other antioxidant proteins such as SOD (Super Oxide Dismutase) or Catalase, Glutathione is a unique tripeptide that aids in neutralization of many different types of free radicals produced within the cell.

**Boost Nitric Oxide Production.**

The formula is based upon our glutathione technology and has been

improved by adding L-Citrulline, a precursor to nitric oxide (NO<sub>2</sub>), which supports blood flow and circulatory health. Similar to glutathione, NO<sub>2</sub> production decreases as we age. Drinking GRB+ can increase your body's natural ability to produce glutathione and NO<sub>2</sub>, boosting athletic performance and preventing premature aging.

**GRB<sup>™</sup>+ ingredients activate Nrf2.**

When Nrf2 is activated, it tells your cells to produce Catalase, Superoxide Dismutase (SOD) and Glutathione. During exercise the body naturally produces free radicals. Activating Nrf2 pathways helps your cells neutralize these free radicals. Eliminating free radicals reduces oxidative stress and inflammation allowing your cells to perform more efficiently.

**More Benefits.**

Glutathione plays many roles. Glutathione is important in health & peak function of the brain, including memory and mental acuity. Studies have shown that individuals who have lived 100+ years have naturally high levels of Glutathione. Glutathione, strengthens your body's mechanisms of detoxification & immune function. Glutathione increases cell ATP production, the more ATP available in cells the more energy available to your body.
